

TRADE WITH JOE REEM

Crypto Signals Handbook - Sample Chapter

Chapter 1 - What a real signal is (and what is noise)

A signal is not a prediction. It is a defined setup with a defined invalidation. Before you touch the chart, write down the three conditions your setup must meet. If one condition fails, the trade is off - no exceptions, no 'but the news is...'.

This is a preview copy of the full handbook. Thank you for choosing Trade with Joreem. Full chapters, the signal checklist and trade templates are included with your purchase.

Risk notice: Trading involves substantial risk. Nothing in this document is financial advice. Never trade money you cannot afford to lose.
